

1. When the animation starts, what do the bar graphs look like?
The positions of the sliders at the beginning are shown below.

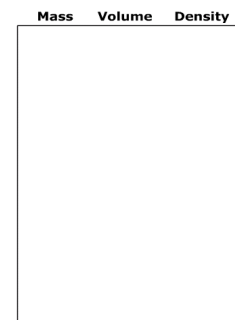

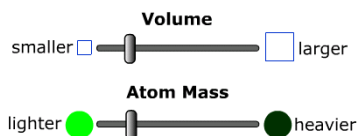

2. The Volume is now increased as indicated by the slider positions shown below. Predict what the bar graphs will look like now. Sketch your prediction in the space provided.

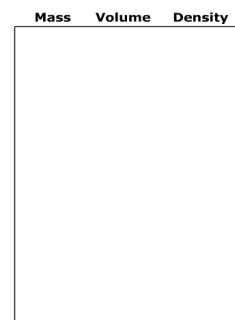

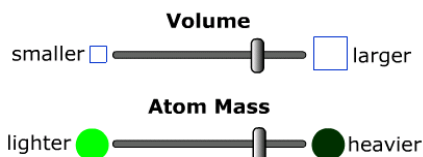

3. The Volume is returned to its starting size. The mass is now increased as shown by the sliders below. Predict what the bar graphs will look like now. Sketch your prediction in the space provided.

4. The Mass and Volume are now BOTH DECREASED as shown by the sliders below. Predict what the bar graphs will look like now. Sketch your prediction in the space provided.

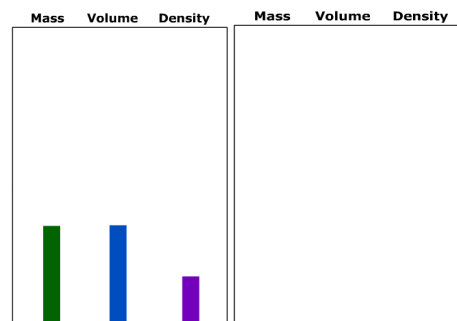

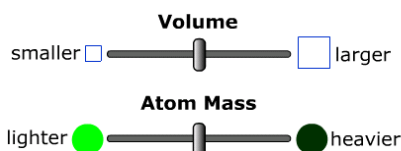

5. The Mass and Volume are now BOTH INCREASED as shown by the sliders below. Predict what the bar graphs will look like now. Sketch your prediction in the space provided.
